- Developed in collaboration with orthopedic professionals
- Moisture transporting
- **eTPU material**, the softest material on the market, which ensures a high rebound effect
- Antistatic
- ESD approved

These soles are supportive with eTPU material throughout, which results in a soft sole and less tired feet after a long workday.

To find the right sole for you, your feet will be scanned on one of our scanners, which will immediately show whether you low, medium or high support.
